

Now there's something  
you don't see.

What it is

How it works

How much it costs

How long it takes

# WHAT IS NINJA CHARGE ?

NinjaCharge is an intelligent web engine that connects **Payment Processors** to their Clients while ensuring that the Clients get the best available rates.

## HOW DOES IT WORK ?

It allows clients to make payments using methods convenient for them while simplifying the integration with a single API. With its global presence and flexibility, it can process any and all types of payments.

# HOW MUCH DOES IT COST ?

The majority of Ninja Charge's services are free. We make money by collecting rebates from the institutions accepting the funds.

It's important to stress how much it DOES NOT cost: Our Clients will get the best available rates due to NinjaCharge's synergistic relationships with a variety of payment processors.

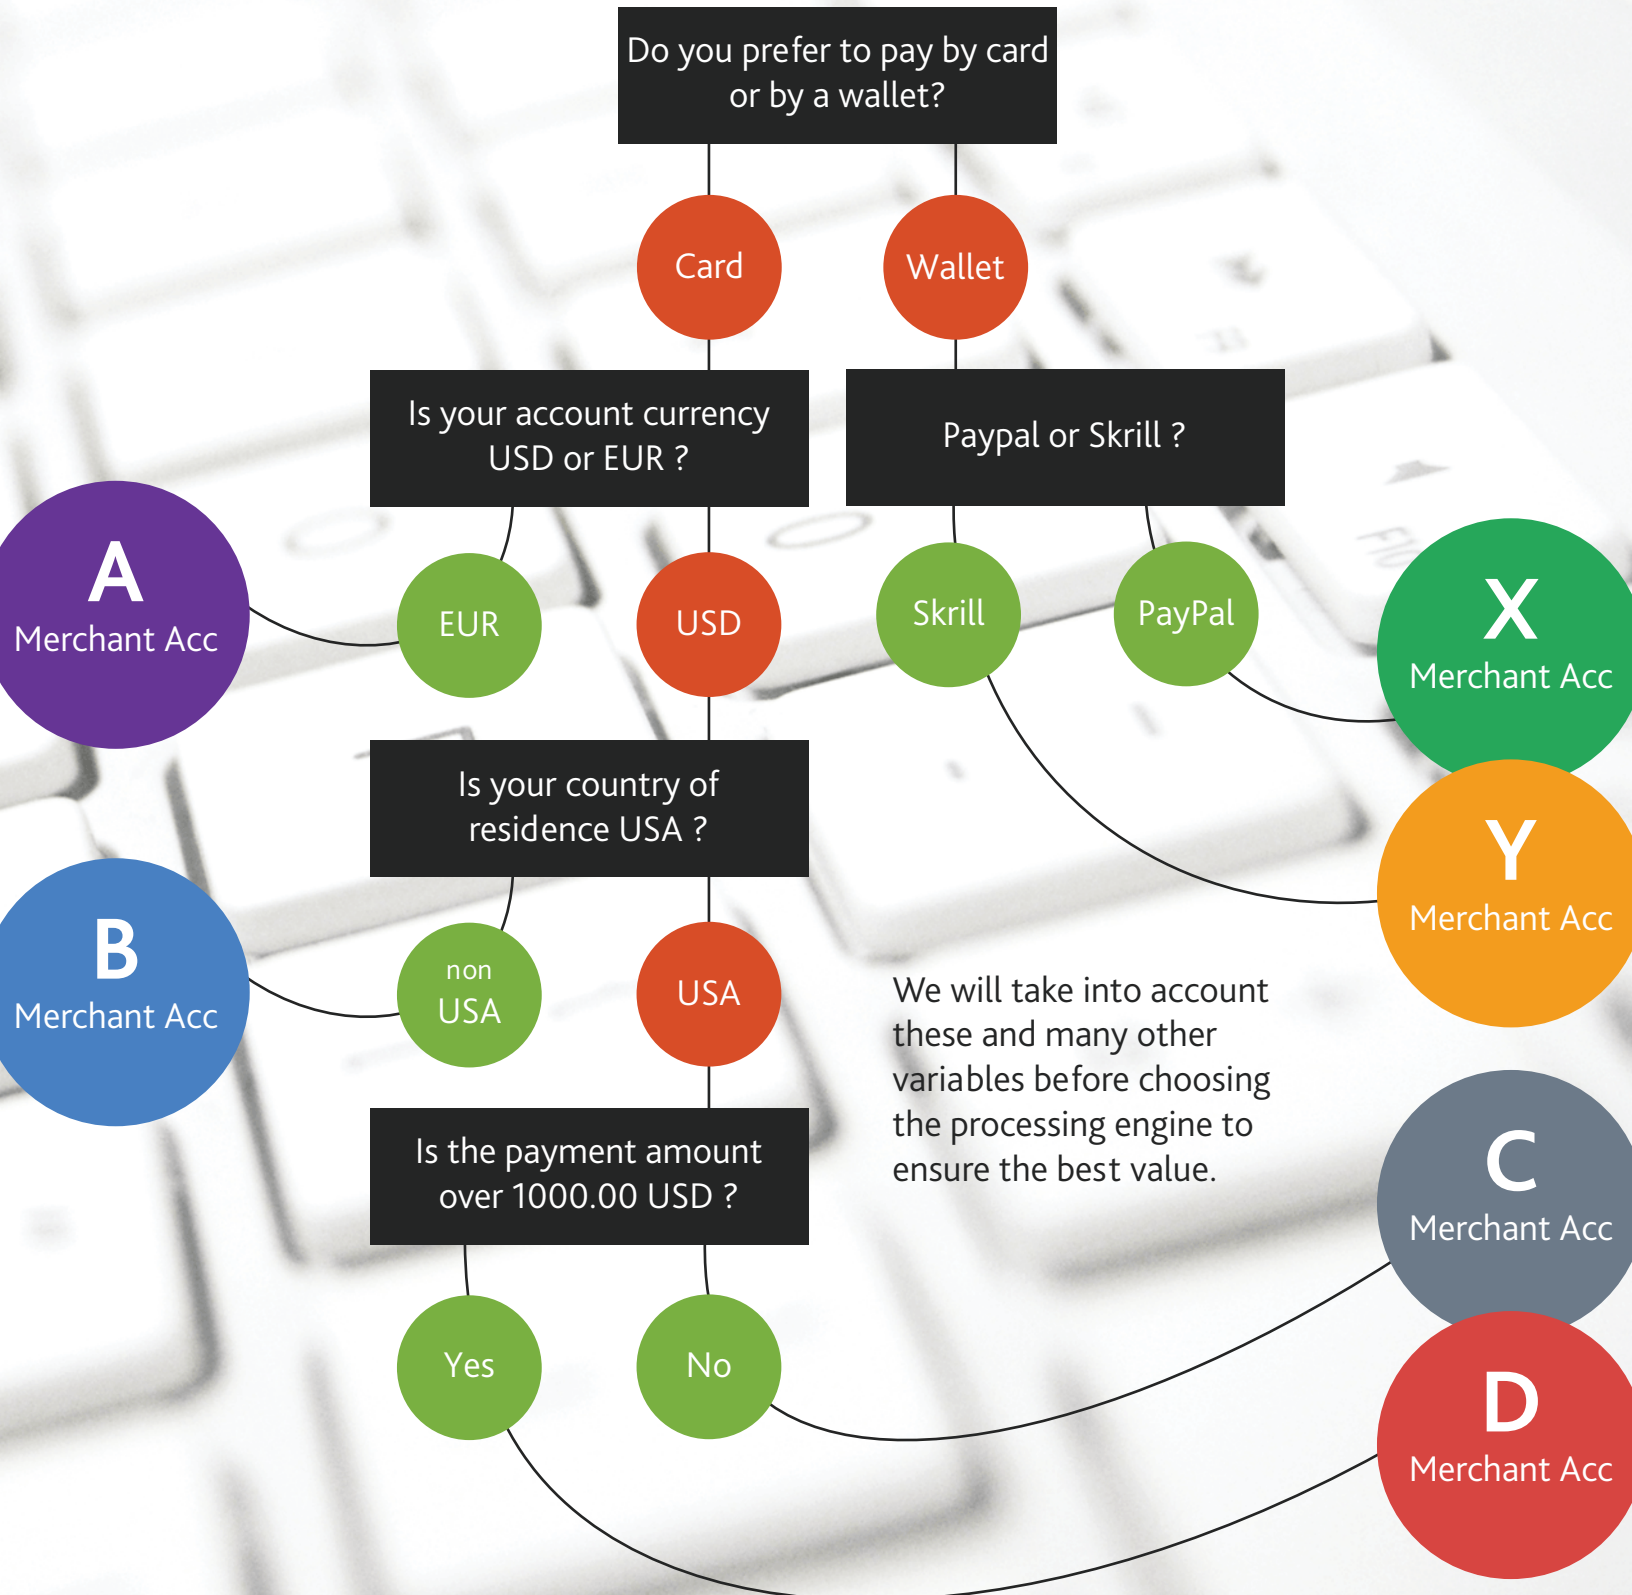

In special cases NinjaCharge may charge up to 1% of the processed amount.

# HOW LONG WILL IT TAKE ?

The exact duration of the setup time varies. It is possible that you will accept your first transaction the same day. In some cases it will take approximately a week.

# John Doe

Wants to make a payment to your company
